INTRODUCTION

Hello, I am Jimmy Yuan a Web Developer in New York City. I have strong problem solving skills, and am always ready to tackle a large project or issue. While working in the payments industry, I was exposed to topics such as Urban Mobility and Smart Cities. These topics hit close to home and inspires me to use my knowledge with technology to create a more livable city.

EXPERIENCE

SOFTWARE ENGINEER | MASTERCARD NYC

August 1st, 2016 - Present

Designed and created an internal ticketing system using a RESTful service. This ticketing system has become a staple to the team, from intaking work to viewing the capacity of the team. The data in the system is also used to create dashboards and reports to analyze trends and billlable hours. I managed the entire process of creating this app, from ideation to production.

WEB DEVELOPER | STONY BROOK UNIVERSITY FSA

January 2015 - January 2016

While working at the Stony Brook FSA, I managed and customized content using the Omniupdate CMS. The website managed provided students information regarding meal plans and campus news.

INTERN | MASTERCARD STL

June 2014 - August 2015

I interned for two summers at the mastercard office in St.Louis. While interning I created web apps to automate and optimize team workflow. This eventually lead to the creation of my full-time role.

INTERN | BLOOMBERG LP

May 2013 - August 2013

As an intern at Bloomberg LP, I was put into a support role. I worked on the Installations team. I called customers to assist them in installing the Bloomberg Terminal and assist them in registering or replacing biometric devices.

TEACHER'S ASSISTANT | STONY BROOK UNIVERSITY

February 2013 - May 2013

As a freshman, I was a teacher's assistant for an introductory web development course at Stony Brook. There I assisted students with HTML, CSS, JavaScript, and a little bit of PHP. That role also included troubleshooting student's technical issues, proctoring exams, and substituting for the professor.
